

GEISINGER HEALTH

CHAIRMAN, NEUROLOGY CO-DIRECTOR, NEUROSCIENCE SERVICE LINE

Almost 100 years old, Geisinger Health is a physician-led health care system, dedicated to health care, education, research and service spanning 42 counties of 20,000 square miles and serving 2.5 million people. An integrated delivery model that includes acute care hospitals, a 700-physician multispecialty clinic and a 215,000 member health plan, Geisinger Health boasts revenues of \$2 billion.

Geisinger Health has exclusively retained Cejka Search to recruit their new Chairman of Neurology for the system. This role also will be the system Co-Director of the Neuroscience Service Line with Steve Toms, MD, formerly of the Cleveland Clinic, and a noted Neurosurgeon and leader of the new Brain Tumor Institute at Geisinger.

Ideal candidates for this Chairman role will have successfully demonstrated their leadership acumen in building and expanding a department of highly skilled neurologists. This health system leader will be innovative in approaches, further developing programs in rural telestroke initiatives, Epilepsy, Movement Disorder, ALS, MS, Dementia, neuromuscular diseases, EMG, EEG, and population based research and more. The organization is eager to start a neurology residency program and eventually a neurosurgery fellowship program to enhance the Neuroscience Service Line.

This outstanding opportunity is open to board certified general neurologists and all neurology subspecialists. Recruiting outstanding neurologists to this burgeoning practice at the Danville and Wilkes-Barre campuses is a priority.
